

Excelle V

SPRUNG FLOOR SYSTEM

for light duty theatres

Excele V sprung flooring systems are the result of rigorous field-tested research to address safety, performance, and reliability standards, and specially designed for permanent installation in light-duty theatre applications. The Excele V system is an engineered system featuring a lower panel of 5/8" void-free, exterior grade, multi-veneer plywood, and an upper panel of 5.35mm void-free exterior grade, multi-veneer plywood. This system uses a unique spline and tongue & groove connection – adding approximately 70% greater strength and elevation stability overall. Excele V is quick and simple to install on your existing substrate and very quiet, with acoustic ratings for both ground and upper level applications. Pre-installed suspension pads are a unique blend of closed-cell sponge of varying durometer and synthetics that perfectly match the “flex” of the panel and assure years of trouble-free service. Excele V is recommended for use with L’AIR Professional DanceVinylor hardwood as the performance surface.

FEATURES INCLUDE:

- 48" wide x 96" long
- Safe low profile of 1-3/8"
- Ergonomically designed for light-duty theatre applications
- Easily installed and adapted to any floor plan
- 98% consistent in suspended quality
- ADA compliant transition ramps available for doorways and open areas
- Acoustic ratings for both ground and upper level installations: ASTM E492 / ASTM E989
- Low maintenance and long – lasting performance
- Three-year limited warranty
